Versatile Python Developer with a strong foundation in web development and a passion for crafting efficient and scalable applications. Proficient in leveraging Django to build robust backend solutions. Knowledgeable in designing RESTful APIs and skilled in containerization with Docker. Equipped with foundational knowledge in JavaScript, and currently exploring React.js for frontend dynamics. Open to collaborative opportunities and eager to contribute to impactful projects and grow as professional developer.

Experience

- Developed end-to-end E-commerce solutions using Django, REST API, and Bootstrap, ensuring a seamless online shopping experience.
- Engineered a chatbot trainer with Django and ChatterBot, enhancing conversational AI capabilities.
- Crafted responsive UIs with JS, HTML, CSS for intuitive user interfaces.
- Automated tasks with Python scripts, streamlining processes for increased efficiency.
- Consistently tackled online challenges on platforms like Edabit, HackerRank, and CodeWars to sharpen problem-solving skills.
- Created versatile web applications using Django, integrating tools like Docker, Celery, and Redis for optimized functionality.
- Deployed web apps on cloud services including Railway, DigitalOcean, and Netlify for scalable and reliable solutions.
- Built dynamic web applications using Vue.js, showcasing proficiency in modern frontend technologies.
- Integrated Vue.js and React seamlessly with Django, demonstrating versatility in combining frontend frameworks for enhanced user experiences.

Education

Mustapha High School   2017- 2018

Bachelor of Economics

Certificate

CODEZILLA   01-02-23 to 01-05-23

- Master the Python language
